

5m high photovoltaic bracket

What is the toughest metal roof PV mounting system?

Designed for coastal communities, island geographies and other high-wind zone areas, the system is also the first metal roof PV mounting system to receive FM Approvals' toughest PV Standard--FM 4478. Centroplan's listed system combines the PVKIT HUR paired with the S-5-E(TM) standing seam clamp, JA modules and the Butler MR-24 roof.

What is a S-5 bracket?

Brackets S-5! brackets are designed for mounting on exposed-fix (face-attached or thru-fastened) metal roofs. Bolt Balance of System components directly to the appropriate bracket without additional interface hardware. provides a dependable and corrosive-resistant attachment solution.

What is a S-5 clamp & bracket?

Clamps Designed for standing seam and concealed-fix metal roof profiles, S-5! clamps can be used to mount ancillary components directly to the roof seams, without the need for any additional interfacing hardware. S-5! Brackets S-5! brackets are designed for mounting on exposed-fix (face-attached or thru-fastened) metal roofs.

What ancillaries can I attach to my PV array?

From service walkways to conduit, wire trays, optimizers, other MLPEs and monitoring equipment, you can use S-5! clamps, brackets and GRIPPERFIX universal utility mounting system to securely attach the above ancillaries to your PV array.

PVKIT HUR 2.0 (High Uplift Resistance) is a first-of-its-kind PV mounting system specifically designed for high wind uplift performance of installed solar panels. Designed to withstand extreme wind uplift forces such as hurricane forces, as ...

The ProteaBracket fits most trapezoidal sheet profiles, including pre-assembled foam core panels (IMPs - Insulated Metal Panels). Adjustable attachment base to accommodate varying rib widths, heights, and angles with multiple module ...
