

Acceptance specification for photovoltaic module brackets

What is a power rail PV module mounting system?

The PV module mounting system engineered to reduce installation costs and provide maximum strength for parallel-to-roof, tilt up, or open structure mounting applications. The POWER RAIL mounting system is designed with the professional PV solar installer in mind.

What is a good load value for a solar mounting system?

a load value no less than 1.0kN/m²(See Note (ii)) for a mounting system. Where testing an individual roof bracket/hook then the load value shall be no less than 0.25kN. the load being considered is the combined static weight/load of the solar mounting system,solar panels,and snow.

Can a racking system be used to ground a PV module?

This racking system may be used to ground and/or mount a PV module complying with UL 1703only when the specic module has been evaluated for grounding and/or mounting in compliance with the included instructions. The system is a non-separately derived system.

Are solar stack roof mounting systems ul 2703 listed?

Solar Stack Roof mounting systems are UL 2703 listed. Standard for safety UL/ANSI 2703,Mounting Systems,Mounting devices,Clamping/Retention Devices and Ground lugs for use with PV modules. Solar Stack systems have been evaluated for module-to-system bonding and mechanical load to the requirements of UL/ANSI 2703.

How do I install a PV module?

Choose an appropriate racking and mounting system for the type of PV module, and install the system along with needed flashing and seals. See the Compliance Tab for related codes and standards requirements, and criteria to meet national programs such as DOE's Zero Energy Ready Home program, ENERGY STAR Single-Family New Homes, and Indoor airPLUS.

Do I need to meter a photovoltaic system?

It is assumed that aluminum framed photovoltaic (PV) panels mounted on a "post" and rail mounting system,the most common in the industry today,will be installed by the homeowner. While metering the system is encouraged,the specification does not address system wiring elements for associated system sensors or monitoring equipment.

At Sun-Age, we specialize in structures for installing photovoltaic and solar systems since 2008.. We understand the particular attention required when fixing solar panels on tile roofs, which is why we offer ready-to-deliver kits tailored to ...
