

Solar panels first journeyed into space in 1958 with the launch of the Vanguard 1 satellite, heralding a new era of sustainable energy beyond Earth. By the 1960s, both American and Soviet programs were extensively using solar panels in ...

Solar panels have been used in space since 1958. Solar panels first journeyed into space in 1958 with the launch of the Vanguard 1 satellite, heralding a new era of sustainable energy beyond Earth. By the 1960s, both American and ...

From ancient civilizations that used sunlight for practical purposes to the development of sophisticated photovoltaic (PV) technology, the journey of solar power reflects human ingenuity and our enduring quest for sustainable energy.

The stones were dated to the Old Kingdom of Egypt, which ruled the Nile Valley from 4,706 to 4,201 years ago. They were etched on both sides with shallow grooves containing traces of copper. Similar, smaller pieces of obsidian with ...
