

Are the photovoltaic panels of Shengdi Xinju of good quality

Is Xinjiang a good place for solar energy?

Compared with the solar energy resources of other provinces in China, Xinjiang is one of the richest regions in China in terms of solar energy resources. In particular, the solar radiation in the south of Xinjiang is similar to that in Tibet [55].

Why are solar panels made in Xinjiang?

More than 40 per cent of China's total reserves are in the arid region. That is an important factor in producing solar panels. Manufacturers make polysilicon through chemical evaporation at high temperatures of around 900 Celsius. Local solar companies have repeatedly sought to assure investors that they do not use forced labour from Xinjiang.

Is Xinjiang suitable for PV power generation?

Few studies have made a more comprehensive assessment of the overall PV power generation potential in Xinjiang. Xinjiang has a variety of landscapes, a slightly less developed economy, and a lack of water resources. Indicators for suitability assessments that have been used in other regions may not be suitable to apply in Xinjiang.

Does solar radiation affect PV power generation in Xinjiang?

Solar radiation is the dominant factor in the potential for PV power generation in each grid. The results show that the theoretical potential of PV power generation increases as we move from northern Xinjiang to southern Xinjiang (Figure 6).

Does Xinjiang receive more solar radiation than lower regions?

The observed sunshine duration data from stations in Xinjiang (2000-2014) were calculated and interpolated. This study used the average annual sunshine duration (SSD) as a criterion. Elevated regions receive more solar radiation than lower regions, but building PV power plants in elevated regions costs a lot [34].

Could Xinjiang's labor program lead to the solar industry?

The veil over Xinjiang has made the search for answers about the links between China's labor program and its solar industry a job for outside researchers--who, it turns out, have found potentially telling details just by combing through public records. Residents stop for a chat nearby the Xinjiang International Grand Bazaar in downtown Urumqi.
