

Automatic welding of photovoltaic panels

How does a photovoltaic module manufacturing line work?

The first phase in a photovoltaic module manufacturing line is joining the solar cells, which is done by a solar tabber and stringer, a totally automatic machine able to optimise the very delicate phase of stringing and tabbing.

Which solar cells can be soldered with ecoprogetti Stringer machines?

Ecoprogetti's stringer machines are designed to work with all the solar cells available on the market (from 166mm to 210 mm), full and half cut. The best soldering output with minimal stress given to the solar cells, realizing high-quality photovoltaic modules with minimized breakages during the transformation process.

Where can I find a complete solar panel line supplier?

If you are looking for complete solar turnkey lines for photovoltaic module manufacturing, Horad will be your reliable PV solar panel line supplier. An automatic bussing machine adopts induction welding and can be applied to 5BB-12BB solar cells of 156-210mm.

How to deliver a solar panel making machine or a production line?

To deliver a solar panel making machine or a solar panel production line that performs, we take special care to quality control in each stage: We are at your side in each stage of building your solar panel factory and production lines. Express your needs on solar panel producing, we will create your custom automation equipment.

A solar powered welding helmet is a type of welding helmet that utilizes solar panels to power the auto-darkening filter. It is a popular choice among welding professionals and enthusiasts because of its convenience and efficiency. The ...
