

# Brief introduction to explosion-proof photovoltaic panels

What are explosion proof solar panels?

Photovoltaic, or solar power modules are used to generate power from the sun. Orga's explosion proof solar panels form a part of a complete system that also comprises a battery unit, battery charger or rectifier unit and a distribution system.

Who is explosion proof solar systems & LED lighting?

Explosion Proof Solar Systems & LED Lighting - RESSCOTT LTD. In 2021, RESSCOTT LTD and JCE Energy formed a Strategic Alliance Partnership (SAP) to introduce Explosion Proof Solar Energy Components & engineering designs, and Explosion Proof LED lighting for the upstream and downstream oil and gas sectors.

Can solar panels be used in a gas explosion hazard area?

They can also be used in zones 1 and 2 gas explosion hazard areas. At Orga we have an enviable track record in the design, engineering and supply of stand alone solar systems and there is so much more to them than just solar panels and batteries.

Which solar panels are ATEX certified?

JCE Group manufacture the SPA series of photovoltaic Ex mb e, Ex nA and Ex ec mc Solar Panels, which are ATEX and IECEx certified products. They are intended for use in areas made potentially hazardous by the presence of flammable liquids, gases or vapours (Zone 1 and Zone 2). Suitable for Category 2 and Category 3 G.

What are ATEX and IECEx solar panels?

ATEX and IECEx solar panels are photovoltaic panels certified for use in areas where explosive atmospheres may be present. These hazardous environments, defined under the ATEX (European) directive and IECEx (International) standards, can occur in locations where flammable substances like gases, vapours, or dust are present.

Are EPL solar panels IECEx compliant?

EPL (Equipment Protection Level) Gb solar panels are IECEx compliant for Zone 1 applications, where the risk of explosion is frequent due to the presence of flammable gases or vapours. For Zone 2 applications, where the risk is intermittent, EPL Gc solar panels are suitable.

A Solar panel (also known as "PV panel") is a device that converts light from the sun, which is composed of particles of energy called "photons", into electricity that can be used to power electrical loads. Solar panels can be used for a wide ...
