

Can I buy plastic lockers Are they safe

Can you use plastic lockers instead of metal lockers?

Facility managers like you have addressed this problem head on and found the solution is actually pretty simple: using plastic lockers instead of metal ones. HDPE (high-density polyethylene) is a highly durable plastic used to create stable and secure lockers that can stand up to the elements.

Are HDPE plastic lockers a good choice?

HDPE plastic lockers are resistant to impacts, dents, and scratches, which not only allows the lockers to remain undamaged, but they won't require a paint job that could affect your air quality. Our HDPE lockers are also impermeable to moisture, which makes them resistant to bacteria, mildew, and mold.

Are plastic lockers better than wood lockers?

Although these lockers can often come with a higher up-front cost, the cost over time of plastic lockers tends to be the lowest. This is due to them being rust, corrosion, and water-resistant. This durable option will also tend to last you the longest, as typically metal lockers will rust and wood lockers are prone to water damage.

Do you offer plastic lockers in the US?

We offer the most extensive range of plastic lockers in the industry in the US. Our national delivery network allows us to deliver to any street address throughout the United States of America.

Why should you choose a plastic locker?
