

What is the optimal bidding strategy for a renewable-based virtual power plant?

Optimal bidding strategy of a renewable-based virtual power plant including wind and solar units and dispatchable loads [J] A risk-based gaming framework for VPP bidding strategy in a joint energy and regulation market [J] Iranian Journal of Science and Technology, Transactions of Electrical Engineering, 43 (2019), pp. 545 - 558 H. Wang, L.

Can pumped storage power stations be used in combined bidding?

Pumped storage power stations are controllable with the characteristic of energy storage. It can be employed in combined bidding with REPPs, improving the flexibility of market bidding. In , it was pointed out that the combined bidding of wind power and pumped storage had good applicability in insular power systems.

What is a co-optimized bidding strategy for Integrated wind-thermal-photovoltaic system?

Co-optimized bidding strategy of an integrated wind-thermal-photovoltaic system in deregulated electricity market under uncertainties [J] Optimal offering of wind-photovoltaic-thermal generation company in energy and reserve markets in the presence of environmental and risk analysis [J]

How to predict photovoltaic power output in the day ahead?

The day-ahead bidding of wind power was guided based on the classification characteristics. In , a dynamic modification method was proposed for the photovoltaic power output prediction in the day ahead, using solar radiation and air temperature forecast results.

What is the optimal bidding strategy of wind power producers?

Optimal bidding strategy of wind power producers in pay-as-bid power markets [J] A hybrid approach based on IGDT-MPSO method for optimal bidding strategy of price-taker generation station in day-ahead electricity market [J]

Can hydrogen energy storage be used in a combined bidding strategy?

With the development of power-to-gas (P2G) technology, hydrogen energy storage, another form of energy storage, can also be applied in a combined bidding strategy. Market frameworks are also studied in some papers. Chen et al. (2022) proposed a semi-centralized market mechanism for energy storage in the day-ahead market.

Methodologically, the following analysis is based on field research visits to both the emerging Caofeidian Industrial Area and Caofeidian Eco-City in September 2010, and again in September 2011, as part of which site visits were ...
