

Comparison of total wind power generation over the years

Which country has the most wind power installed in 2023?

In the past years, wind energy installations have been growing rapidly. In 2023, the total wind power capacity installed worldwide surpassed one terawatt, growing by more than 100 gigawatts in comparison to the previous year. China is the leading country in terms of cumulative wind installations and newly installed wind power capacity.

How much wind power does the United States have?

In another major milestone, the United States passed 150 Gigawatts of total wind capacity, but the market was much weaker than in the previous year, adding only 6,4 Gigawatt - much less than in 2022 and in 2021, when 13,7 GW were added, more than double the capacity of 2023.

How much wind power does the world need?

The world's installed wind power capacity now meets around 10% of global electricity demand - another important milestone. More than ten countries now have a wind power share of more than 20%, led by Denmark, which generates an astonishing 56% of its electricity from wind.

Which country has the most wind power?

China is the leading country in terms of cumulative wind installations and newly installed wind power capacity. In 2023, the Asian country added some 76.7 gigawatts of wind power, which translates to more than three-quarters of the global capacity added that year.

How many GW of wind power are there in 2022?

The worldwide total cumulative installed electricity generation capacity from wind power has increased rapidly since the start of the third millennium, and as of the end of 2022, it amounts to almost 900 GW.

How many terawatt hours of wind electricity are generated in 2023?

In 2023, around 425.2 terawatt hours of wind electricity were generated in the United States. Wind has advanced to become the main source of renewable power generation in the U.S., ahead of conventional hydropower. Recent years have seen significant increases in U.S. clean energy investments, specially the years between 2020 and 2022.
