

Customized installation of solar panels

Why should I get a custom solar panel design?

Receive a custom prepared design for a solar panel system prepared by an experienced technician. This personalized solar design helps you to make an informed, unbiased decision to find the best solar power system at the lowest cost.

Can I make a solar panel in a custom shape?

Yes, it is possible to make a solar panel in a custom shape. At Voltaic, we manufacture custom and standard small solar panels and while most are rectangular, we have experience designing and deploying a full range of interesting shapes and sizes.

How much does it cost to design a custom solar panel?

There are no design fees to create a prototype of your custom solar panel. Some, but not most, designs may require a fee to prepare the machinery to create your specific panel at volume. Our MOQ is 500 - 2,000 units depending on the size of the panel.

Where should a solar power system be installed?

Regardless of the type of solar panel used, the most ideal setup for a solar power system is installing solar panels on a roof-- in a region with long peak sunlight hours -- with the panels facing south (for homes in the Northern Hemisphere). Investing in a solar power system is easier today than ever before.

What is a personalized solar design?

This personalized solar design helps you to make an informed, unbiased decision to find the best solar power system at the lowest cost. Understand your options for residential or commercial modules, on-grid or off-grid, backup systems, rooftop or ground mounting.

Does Home Depot install solar panels?

Every year, The Home Depot helps thousands of homeowners install solar power systems that will reduce the cost of their monthly electricity bills. Transitioning to solar power requires custom designers and experienced contractors who can work with you on the installation of your solar panels from start to finish.
