

District Baisha Photovoltaic Panel

What is the largest PV project in Baisha?

The largest capacity PV and ESS project in the Baisha region is a Photovoltaics Set, which has a 100 MW capacity and is located 75 meters above sea level on the southern island of Hainan. This project is expected to produce approximately 128 million kWh of clean electricity for the local grid per year, saving around 41,600 tons of standard coal annually.

How will Hainan Haima's solar power project work?

The project will utilize the 31,300-square-meter roof area of the Hainan Haima Automobile Co., Ltd. assembly plant to generate a planned capacity of 4.6 MW through photovoltaic cells. Once the factory's energy needs have been met, surplus power will be sold back to the grid.

What is Huaneng Hainan Haima Automobile assembly workshop 4.6 MW distributed photovoltaic project?

In May last year, construction began on the Huaneng Hainan Haima Automobile Assembly Workshop 4.6 MW distributed photovoltaic project. The project will utilize the 31,300-square-meter roof area of the Hainan Haima Automobile Co., Ltd. assembly plant to generate a planned capacity of 4.6 MW through photovoltaic cells.
