

Eight major hazards of rooftop photovoltaic panels

Can a roof-mounted photovoltaic system cause a fire?

Fires on roof-mounted photovoltaic (PV) systems are rare. When they do happen, however, a combination of electrical hazards, combustible components and limited access can result in significant losses. As the technology becomes more common, this paper discusses how building owners and occupiers should approach and minimise the risks of PV systems.

Are rooftop PV systems a fire hazard?

Fire safety concerns include electrical ignition sources, combustible loading, and challenges for manual firefighting. Numerous fire incidents have occurred involving industrial and commercial building rooftop PV systems.

Are PV panels a fire risk?

This is in line with findings by Kristensen and Jomaas (2018). **KEY TAKEAWAYS:** The fire risk with PV panels on roofs is larger than without panels. Assessing the fire safety of a PV installation must be done on the system level because individual elements do not necessarily present the risk comprehensively. However, the true risk emerges

Can a PV system cause a roof fire?

PV systems increase both the probability and the consequence of a roof fire. In addition, a PV system on a roof will cause a change in firefighting tactics because they create a substantial physical hindrance and because precautions have to be made when

Are roof-mounted PV systems a fire risk control system?

Roof-mounted PV systems frequently remain outside the scope of traditional risk control systems such as building sprinklers and fire detection. There is little comparable data on fire and roof-mounted PV systems. The US National Fire Data Center does not track PV-fires, filing them under 'other' causes.

Can rooftop PV systems prevent fires?

Numerous fire incidents have occurred involving industrial and commercial building rooftop PV systems. The key to preventing fires is high quality design, installation and testing in accordance with applicable electrical codes and minimizing the combustible loading.

Tech Talk 8: Understanding the fire hazards of photovoltaic systems. Risk advisory | August 2018. As energy costs rise, solar power is becoming a fast growing energy source. Roof tops of industrial and commercial buildings are ...
