

Energy storage cabinet fireproof door lock

What are cellblock battery storage cabinets?

CellBlock Battery Storage Cabinets are a superior solution for the safe storage of lithium-ion batteries and devices containing them. Our practical, durable cabinets are manufactured from aluminum, and lined with CellBlock's Fire Containment Panels.

Can a storage cabinet withstand a fire?

Fire-rated storage cabinets are designed to withstand fires that start on the outside and typically will not withstand a fire with lithium-ion batteries beginning from within. Adequate ventilation could also be an issue.

Can it be stored outside?

What is a fireproof cabinet?

They have 1-1/2-in (38-mm) of insulating air space for fire resistance. A Justrite fireproof cabinet has high-performance, self-latching doors. They close easily and securely for maximum protection under fire conditions. The doors include a three-point stainless steel bullet latching system.

Are battery storage cabinets safe?

Without the right separation, climate, and safety measures in place, storing batteries on-site poses a dormant but potentially expensive and devastating threat to your work environment. CellBlock Battery Storage Cabinets are a superior solution for the safe storage of lithium-ion batteries and devices containing them.

Do Ion-line storage cabinets have fire protection?

Discover the ION-LINE storage cabinets. Charging lithium batteries outside working hours and unattended can pose an increased fire risk. For this reason, the ION-LINE charging cabinets are equipped with 90-minute fire protection from the inside to the outside and vice versa.

What are CellBlock Fire Protection Panels?

CellBlock's Fire Protection Panels incorporate CellBlock's proprietary dry extinguishing agent, CellBlockEX. They are part of CellBlock's premium solutions for safely storing and charging Lithium-ion batteries.
