

# Energy storage lithium battery price trend chart

How much does a lithium ion battery cost?

Currently, 54% of the cell price comes from the cathode, 18% from the anode, and 28% from other components. The average price of lithium-ion battery cells dropped from \$290 per kilowatt-hour in 2014 to \$103 in 2023. In the coming months, prices are expected to drop further due to oversupply from China.

How have lithium-ion battery prices changed over the last 10 years?

Lithium prices, for example, have plummeted nearly 90% since the late 2022 peak, leading to mine closures and impacting the price of lithium-ion batteries used in EVs. This graphic uses exclusive data from our partner Benchmark Mineral Intelligence to show the evolution of lithium-ion battery prices over the last 10 years.

What is the global market for lithium-ion battery recycling?

The global market for lithium-ion battery recycling is expected to reach 35 billion U.S. dollars by 2031. This figure compares to around six billion U.S. dollars in 2022. Get notified via email when this statistic is updated.

How does battery demand affect nickel & lithium demand?

Battery demand for lithium stood at around 140 kt in 2023, 85% of total lithium demand and up more than 30% compared to 2022; for cobalt, demand for batteries was up 15% at 150 kt, 70% of the total. To a lesser extent, battery demand growth contributes to increasing total demand for nickel, accounting for over 10% of total nickel demand.

Should lithium ion batteries be recycled?

Incorrect disposal of Li-ion batteries can have a devastating environmental impact on the environment, sparking the need for recycling. The global market for lithium-ion battery recycling is expected to reach 35 billion U.S. dollars by 2031. This figure compares to around six billion U.S. dollars in 2022.

Are lithium-ion battery prices back to a nosedive?

After a brief hiatus, lithium-ion battery prices are back to their regularly scheduled nosedive. Throughout the 2010s, batteries got cheaper and cheaper, cheering the businesses and climate activists that want to convert vehicles to electric and bolster renewable power plants with flexible energy storage.

Data until March 2023. Lithium-ion battery prices (including the pack and cell) represent the global volume-weighted average across all sectors. Nickel prices are based on the London Metal Exchange, used here as a proxy for global ...

Price of selected battery materials and lithium-ion batteries, 2015-2023. In 2022, the estimated average battery price stood at about USD 150 per kWh, with the cost of pack manufacturing accounting for about 20% of total battery cost, ...
