

# Energy storage lithium battery supplier ranking

What is the global lithium-ion battery supply chain ranking?

Now in its fourth edition, the Global Lithium-Ion Battery Supply Chain Ranking considers 46 individual metrics to track the supply chain potential across five equally weighted categories: raw materials, battery manufacturing, downstream demand, ESG considerations, and 'industry, infrastructure and innovation'.

What is the global lithium-ion battery supply chain database 2024?

InfoLink sees global energy-storage installation increase by 50% to 165 GWh and energy-storage cell shipments by 35% to 266 GWh in 2024. Global Lithium-Ion Battery Supply Chain Database 2024 Database contains the global lithium-ion battery market supply and demand analysis, focusing on the cell segment in the ESS sector.

Can Canada build a sustainable lithium-ion battery supply chain?

London, February 5, 2024 - Canada has overtaken China for the top spot in BloombergNEF's (BNEF's) Global Lithium-Ion Battery Supply Chain Ranking, an annual assessment that rates 30 countries on their potential to build a secure, reliable, and sustainable lithium-ion battery supply chain.

How much lithium ion battery shipments in 2024?

According to InfoLink's global lithium-ion battery supply chain database, energy storage cell shipment reached 114.5 GWh in the first half of 2024, of which 101.9 GWh going to utility-scale (including C&I) sector and 12.6 GWh going to small-scale (including communication) sector.

What is the lithium-ion battery market database?

Database contains the global lithium-ion battery market supply and demand analysis, focusing on the cell segment in the ESS sector. We compile detailed data on various businesses' capacity, production, and shipments, as well as segmenting the market applications such as FTM, BTM-C&I, and BTM-Residential.

What is the lithium-ion battery manufacturing industry?

The lithium-ion battery manufacturing industry is centered around creating, developing, and marketing highly efficient, safe, and environmentally friendly energy storage systems.

The landscape of the lithium battery industry in China has seen a dynamic transformation, evolving into a critical component of the global energy transition towards electric mobility and renewable storage solutions. In 2024, Chinese ...
