

Feasibility study report on solar concentrated power generation

Why is a solar feasibility study important?

The solar feasibility study is also of paramount importance to any investment in solar power systems, since it provides detailed assessments of solar energy production potential as well as establishing a fundamental platform for future engineering design.

What is concentrated solar power (CSP) & thermal energy storage (TES)?

Concentrated solar power (CSP) is a promising technology to generate electricity from solar energy. Thermal energy storage (TES) is a crucial element in CSP plants for storing surplus heat from the solar field and utilizing it when needed.

Is a concentrated solar power plant a viable solution?

Abstract: To resolve power crisis and reduce environmental effect of conventional power generation, a concentrated solar power (CSP) plant is a viable solution.

Are stand-alone solar power plants feasible?

The feasibility of stand-alone solar power plants (SASPPs) is compared with coal fired power plant (CFPP) and solar aided coal fired power plant (SACFPP). The feasibility analysis in terms of performance and levelised electricity cost (LEC) is carried out for various technologies with capacities.

Can energy storage systems be used to generate electricity from solar energy?

To overcome this issue, researchers studied the feasibility of adding energy storage systems to this power plant [15,16]. Concentrated solar power (CSP) is a promising technology to generate electricity from solar energy.

How do I conduct a solar power feasibility study?

To conduct a solar feasibility study, the engineer or the designer must obtain the following customer-supplied documentation: Solar power feasibility studies usually involve several site visits and a close collaborative effort with the owners: Solar Power Site Survey Guide and Logs

Concentrating solar power (CSP) is a high-potential renewable energy source that can leverage various thermal applications. CSP plant development has therefore become a global trend. However, the designing of a CSP plant for a given ...
