

Female contractor for photovoltaic panel installation

Who is a PV installer?

A PV installer is defined as a person who is directly engaged with the electrical connection and wiring of a photovoltaic system project in a capacity other than as an inspector, management planner, consultant, project designer, contractor or supervisor for the photovoltaic system project

Why should you hire a contractor for your solar panel installation?

A knowledgeable contractor will help guide you through the process and ensure that you maximize both the immediate benefits of and future return on your solar panel installation. At Modernize, we frequently speak to homeowners about their home improvement projects.

Can a solar contractor install a pool heater?

CP,RP - Several local licensing jurisdictions have established a solar contractor certificate of competency that is usually designated as an RX license. These are limited to the installation of solar water or pool heaters only within the jurisdiction that has granted the license, and generally will not be authorized to install PV systems.

How do I choose a solar installer?

Credibility and Expertise- Seek out installers who have experience installing solar equipment and are knowledgeable about all aspects of the process. A good rule of thumb is to work with installers who have at least three years of experience. Ask them how long they've been in business and how many solar energy systems they've installed.

Can solar panels fit around protruding vent pipes?

Most roofs have protruding vent pipes. Some installers will place the panels to fit around these vents, but you may not like how that looks. If you're getting your roof repaired prior to installation and you have protruding vents, you can ask if the vents can be moved to a spot where there won't be solar panels.

What is Pure Power Contractors?

Pure Power Contractors (PPC) is a fully licensed General and Electrical contractor specializing in the design, engineering, installation, and maintenance of photovoltaic systems. PPC has a resume including over 800 MW of installed PV systems, with a primary focus on utility scale ground mount designs.
