

Full set of photovoltaic bracket production machines

What is the production capacity of photovoltaic brackets?

The company's standard industrial plant area is 30,000 square meters, and the annual production capacity of photovoltaic brackets is 6G watts. The cumulative shipment is more than 15G watts. The products are distributed in more than 30 countries and regions around the world.

What is a photovoltaic service provider?

It is a one-stop service provider for the photovoltaic industry, integrating photovoltaic support R&D, design, production, sales and project management. It is committed to becoming the world's leading safety experts of photovoltaic system.

Can versol mount a photovoltaic power station?

Versol's V-Basic mounting system can be applied to photovoltaic power station in different terrain and environment. The product range includes a wide range of models and styles, and is highly adaptable.

What is versol V-basic mounting system?

As a global leader in photovoltaic mounting structure product manufacturing and system solutions, Versol solar is committed to becoming a global leader of high-end equipment and intelligent services in new energy industry. Versol's V-Basic mounting system can be applied to photovoltaic power station in different terrain and environment.

Solar photovoltaic bracket forming machine is used to produce brackets related to the electrical industry, and the finished product is a multifunctional application of lap bracket. It is often used to build multi-purpose brackets in the field of ...

Central to the functionality of the fully automated photovoltaic bracket production line are our powerful three-in-one decoiler straightener feeder machines, seamlessly integrated with a punching press and cold bending forming machine.

An automatic Bussing machine is used for welding of busbars and interconnection in solar module production. The Bussing machine is compatible with 156-230mm, 5BB-20BB, half-cell/full-cell busbar soldering, cycle time 22 s/module, and ...
