

Even with near-term headwinds, cumulative global energy storage installations are projected to be well in excess of 1 terawatt hour (TWh) by 2030. In this report, Morgan Lewis lawyers outline some important developments in recent years ...

Finally, overall conclusions and future perspectives for the sustainability of energy storage devices are presented in the last chapter. 1 Introduction Since 1990s, lithium-ion batteries (LIBs), as the representative technology for renewable ...
