

How much does LONGi's new photovoltaic panels cost

How much do LONGi Solar panels cost?

The cost of LONGi Solar panels can vary. Installation difficulty and shipping expenses are two things that can change, making it challenging to pinpoint costs. LONGi solar panels cost an average of \$2.40 to \$2.67 per watt, as of 2023. This price is cheaper than the industry average of \$2.82 per watt, making LONGi panels a cost-effective option.

Are LONGi Solar panels a good choice?

Our review of LONGi solar panels finds that the brand is a practical and economical choice for those interested in solar energy, offering competitive prices and high efficiency ratings. Other factors that affect the installation cost of a LONGi Solar array include:

How many solar panels does Longi produce a year?

Their annual production capacity is reported to be 105GW for silicon wafers and 60GW for solar panels Q2 2022. LONGi owns most steps in the vertical supply chain to produce a solar panel including producing ingots, silicon wafers and solar cells.

Is LONGi Solar a trusted Solar Energy brand?

Moreover, Australians voted LONGi as a trusted solar energy brand in 2020, placing it among LG and SunPower, the only other panels that got this vote. In 2007, LONGi purchased one of its main competitors, Lerrri Solar, which rebranded to LONGi Solar in 2017. This gave Lerrri Solar a leading position in the Australian market.

What makes LONGi Solar a Tier 1 solar panel brand?

A Tier 1 solar panel brand, LONGi Solar integrates state-of-the-art features like PERC (passivated emitter and rear contact) technology, which enhances solar panel efficiency by reducing energy loss and maximizing electricity generation from the sun's rays. All its panels are half-cut cell modules, increasing their efficiency.

How long do LONGi Solar panels last?

So, LONGi's solar panels suffer less damage and last longer. Most panels use Boron-doped P-type silicon wafers, and these degrade faster, with 83% power retention after 25 years. LONGi's solar panels lose only about 2% of their initial power rating in the first year and under 0.55% per year after that.
