

# How much does a full set of photovoltaic brackets cost

How much does a solar panel cost?

The average cost of solar in the U.S. is \$31,558, based on the latest cumulative data from the Lawrence Berkeley National Laboratory, a Department of Energy Office of Science laboratory. Solar panel costs are calculated by the price per watt. The average price per watt in the U.S. is \$3.67 for an 8.6 kW system (rounded up).

How much does solar installation cost?

According to the NREL data above, installation typically accounts for 5.5% of the total cost of a residential solar project, so this equation will get you a ballpark figure for labor costs. For example, if you receive a solar quote for \$25,000, you can expect labor to make up around \$1,375 of the all-in cost.

How much does solar cost per watt?

To put that in perspective, using the modeled market price (MMP) of \$2.95 per Watt for residential solar, labor costs contributed just 16 cents per Watt of solar capacity installed. That's tied with structural balance of system (racking) for the second smallest piece of the solar cost pie, as shown below.

How much does a 6kW Solar System cost?

Including racking and mounting, an average 6kW solar system would cost about \$18,000 given the US average solar panel cost of about \$3.00 per watt as of January 2023. After applying the federal solar tax credit of 30%, that works out to \$12,600.

How much does a solar project cost?

For example, if you receive a solar quote for \$25,000, you can expect labor to make up around \$1,375 of the all-in cost. (Check out our solar calculator to estimate the cost of your project.)

How much do solar panels cost in 2024?

Here's an explanation for The average solar panel system in 2024 costs about \$31,558 before factoring in tax credits and solar incentives. The Residential Clean Energy Credit is part of the Inflation Reduction Act and offsets the total cost of solar panels by 30 percent when you file your annual federal tax return.
