

# How much does it cost to generate electricity from solar panels

How much does a solar panel cost?

The average cost of solar in the U.S. is \$31,558, based on the latest cumulative data from the Lawrence Berkeley National Laboratory, a Department of Energy Office of Science laboratory. Solar panel costs are calculated by the price per watt. The average price per watt in the U.S. is \$3.67 for an 8.6 kW system (rounded up).

How much does a solar system cost per watt?

Ultimately many factors figure into the price per watt of a solar system, but the average cost is typically as low as \$2.75 per watt. This price will vary if a project requires special adders like ground mounting, a main panel upgrade, an EV charger, etc.

How much does a 5 kilowatt solar system cost?

The average 5-kilowatt (kW) solar panel system is \$14,210 before considering any financial incentives. However, a typical American household needs a system closer to 10 kW to adequately power their home, which costs \$28,241 in 2024. That price effectively drops to \$19,873 after considering the full federal solar tax credit.

How do you price solar panels?

In our expert opinion, the most effective and accurate method for pricing solar panels is the gross cost. Let's explain why and then discuss each pricing model in detail. A lot of work goes into ensuring that you can safely turn on your solar power system—the process is much more involved than simply attaching solar panels to your roof.

How much does a solar loan cost per watt?

Solar loans will increase your price per watt. The average cost for solar panels financed with a solar loan is between \$3.80 and \$4.25 per watt because of financing fees. Don't be surprised when you get a quote that seems high if it includes a solar loan!

How much does a home solar installation cost?

The faster the cost of electricity increases, the shorter your payback period and the greater your savings will be. Lower solar prices also drive shorter payback periods. Ten years ago, a home solar installation cost \$3.60/W according to the National Renewable Energy Laboratory. That's 31% more than what we see on EnergySage right now.

To adequately use the "how many solar panels do I need to power my house calculator" below, you will need to estimate how much electricity you spend each year. ... This goes without saying; solar panels can cost \$5,000, \$10,000, ...
