

# How much does it cost to generate solar power at home

How much does it cost to install solar panels?

According to our solar experts, solar panels cost about \$19,000 to install in the United States, on average. While the price tag seems steep, incentives and payment options help make the cost of going solar easier to manage. The total cost of a solar installation depends on your location, energy usage, and even the type of equipment you use!

How much do solar panels cost per watt?

The average cost per watt for solar panels in the U.S. is \$2.84 for residential systems. High-efficiency monocrystalline panels tend to be at the higher end of the price range, but they generate more power with fewer panels--ideal if you have limited roof space.

How much does a solar system cost?

Solar panel costs are calculated by the price per watt. The average price per watt in the U.S. is \$3.67 for an 8.6 kW system (rounded up). Compare the average cost of solar in the U.S. based on system size before applying incentives. To estimate how much a system will cost, multiply the price per watt by the system size.

How much does a solar system cost for a 3,000 square foot home?

The average pre-incentive cost of a solar system for a 3,000 square foot home was \$30,100 based on thousands of sales conducted on solar.com in 2022. The number of panels in these systems depends on the price point from the installer and power rating of each panel. The table below shows a few common scenarios for a 3,000 square foot home.

How do you price solar panels?

In our expert opinion, the most effective and accurate method for pricing solar panels is the gross cost. Let's explain why and then discuss each pricing model in detail. A lot of work goes into ensuring that you can safely turn on your solar power system--the process is much more involved than simply attaching solar panels to your roof.

How much does a solar panel upgrade cost?

Electrical panel upgrades: Not all homeowners need to get a new electrical panel when they go solar, but if you live in an older home or your breaker box is too small, you may need to get an upgrade. Depending on the project, and electrical panel upgrade for solar could cost between \$2,000 and \$3,000.

These tools are great for getting started, but make sure to work with a solar installer for a custom estimate of how much power your solar energy system is likely to generate. For its analyses, NREL uses an average system size of ...
