

# How to detect the power generation rate of photovoltaic panels

The lifespan of a solar panel can be calculated based on the degradation rate:  $L_s = 1 / D$ . Where:  $L_s$  = Lifespan of the solar panel (years)  $D$  = Degradation rate per year; If your solar panel has a degradation rate of 0.005 per year:  $L_s = 1 / ...$

Example chart showing the rate of solar panel degradation over a 30 year period ... but it has been found to occur on various first-generation Monocrystalline PERC cell panels produced from around 2016 to 2020. PID is essentially a voltage ...
