

How to settle solar power generation

What happens if my solar generating system produces more energy?

Sometimes your solar generating system produces more energy than you need. When this happens, SCE buys your surplus energy, and you get credit for it. Similarly, when your solar generating system is producing less energy than you need - for example, at night, or when it's cloudy - SCE will provide energy and you'll be charged for it.

What is the solar billing plan (SBP)?

The Solar Billing Plan (SBP) is a new program for customers who apply for interconnection of an eligible renewable generating system, such as solar or wind, after April 14, 2023. The Solar Billing Plan succeeds the Net Energy Metering (NEM) 2.0 program.

Does going solar cost a lot?

Thanks in part to Solar Energy Technologies Office (SETO) investments, the cost of going solar goes down every year. You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy.

How do I keep my solar system working?

Shift major appliance and equipment use to off-peak daytime hours (8 a.m. - 2 p.m.) when your solar generating system is active. Try not to use too many appliances simultaneously during the day, so your system can keep up. Periodically have your solar panels professionally cleaned.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version [here](#).

What is the solar billing plan?

The Solar Billing Plan succeeds the Net Energy Metering (NEM) 2.0 program. For customers considering solar and other renewable generation at their homes, the Solar Billing Plan is designed to help modernize solar rates to promote grid reliability, incentivize solar and battery storage, and help control electricity costs for all Californians.

"Net metering is a billing mechanism that credits solar energy system owners for the electricity they add to the grid" according to the Solar Energy Industries Association (SEIA). Net Metering is short for Net Energy Metering (NEM). ...
