How to use the roof tools on photovoltaic panels

Installing your own solar panels on your roof might seem like a massive undertaking, but it really isn"t. You may be entirely capable of doing it yourself! We"ll walk you through a DIY solar installation step-by-step a little ...

While solar panels can usually be safely and effectively installed on all roof materials, the exact installation processes may differ. As such, there is no "best" roof for solar - panels can go on just about any roof material. Below, ...
