

Solar Photovoltaic Cell Basics. When light shines on a photovoltaic (PV) cell - also called a solar cell - that light may be reflected, absorbed, or pass right through the cell. The PV cell is composed of semiconductor material; the ...

Solar panels 101. Solar panels are the most important part of a solar power system since they produce the electricity that eventually finds it's way to your laptop, lights and television. In this basic introduction, we look at how this ...

What is photovoltaic (PV) technology and how does it work? PV materials and devices convert sunlight into electrical energy. A single PV device is known as a cell. An individual PV cell is usually small, typically producing about 1 or 2 ...
