

# Is it safe to install photovoltaic panels at the seaside

Can you install solar panels in a marine environment?

Marine solar panel installations. Simple, right? Not so much. Installing solar in a marine environment, weather on a boat, near the waterfront or in a coastal zone is drastically different than building a solar power array in other areas.

Can I install solar panels near the ocean?

If you live near the ocean and are considering solar panels, the first thing to consider is if your location gets enough sunlight to warrant solar panel installation. For instance, if you live in Southern California, such as Los Angeles, you will experience, on average, around 283 sunny days per year.

Can solar panels withstand sea spray?

Wind and waves can cause sea spray to be carried well over 100 meters inland and any solar panel within the sea spray's reach needs to be especially corrosion resistant. Fortunately, there are a large number of solar panels suitable for use by the seaside.

Should you install solar panels on your waterfront home?

For homeowners who live near the ocean, installing solar on your waterfront home is an excellent way to reduce energy costs. From saving money to making a positive impact on the environment, there are many benefits that come with the renewable energy produced by solar panels.

Should I add solar to my beachfront home?

Adding solar is an easy way to keep your electricity costs as low as possible for your beachfront home. Just make sure your solar panels are certified to meet IEC 61701 standards for exposure to salt spray. Are you ready to add solar to your beachfront home?

Do solar panels work in a coastal environment?

Most solar panel brands and models have passed the IEC 61701 Salt Mist Corrosion Test and are certified to work well in a coastal environment. This test simulates the harsh conditions of an oceanfront solar installation, complete with salt spray, moisture, and variable temperatures.

Installing Solar on a Standing Seam Metal Roof. Conveniently, installing solar on a standing seam metal roof does not require drilling holes, decreasing the risk of leakage or damage. Multiple manufacturers have developed specific solutions ...
