

Latest price list of photovoltaic panels in shopping malls

Is solar a good investment for a retail shopping center?

Investing in solar photovoltaic systems can be a wise investment for a retail shopping center owner. In many states and situations, installing solar power in a mall or other retail shopping centers can provide a serious competitive advantage over competitors that do not invest in solar.

Why should you install solar panels on a shopping mall?

Electricity can be stored in batteries until it is needed during an emergency or when the sun goes down. Solar power provides an efficient source of power. Renewable energy produces zero pollution. Installing solar panels on shopping mall rooftops provides great publicity for reducing pollution.

Where can I find information about solar panels?

Browse and compare solar panels from top manufacturers on the EnergySage Buyer's Guide. To learn about other solar energy system components, visit EnergySage's solar inverter and solar battery buyer's guides. Solar panels are the key component in any residential, commercial, or utility-scale solar energy system.

What are the benefits of solar power in a mall?

In addition to saving money, creating jobs and creating economic development, the best thing about solar power in a mall is that it produces zero air pollution.

Should you install solar power on your retail shopping center rooftops?

Installing solar power on retail shopping center rooftops could also provide MACRS depreciation and huge tax write-offs. Take advantage of a 30% federal tax credit and any state tax credit that might be available. MACRS depreciation allows shopping mall owners to depreciate a large percentage of the system cost in the first year of operation.

How much do solar panels cost per square foot?

On average, solar panels cost \$8.77 per square foot of living space, after factoring in the 30% tax credit. However, the cost per square foot varies based on the size of the home. For example, the post-tax credit cost of solar panels for a 2,500-square-foot home is around \$20,000 for a rate of \$7.96 per square foot.
