

Leading material company for photovoltaic panels

Who is Targray solar?

Targray solar materials, modules and supply chain solutions are a trusted source for photovoltaics manufacturers, solar suppliers, project developers, contractors, installers and EPCs in over 50 countries. Our solar procurement programs encompass a broad range of material sourcing, trade financing and inventory management services.

Is polysilicon a bottleneck for solar PV?

Global capacity for manufacturing wafers and cells, which are key solar PV elements, and for assembling them into solar panels (also known as modules), exceeded demand by at least 100% at the end of 2021. By contrast, production of polysilicon, the key material for solar PV, is currently a bottleneck in an otherwise oversupplied supply chain.

What is raw polycrystalline silicon for PV Manufacturing?

Raw polycrystalline silicon for PV manufacturing. Offered in various grades and formats including chunks, chips, powder and ingot. Junction boxes offering exceptional heat dissipating performance and manufacturing flexibility for solar panel producers.

Are Targray solar panels good for building integrated photovoltaics (BIPV) systems?

Targray has unveiled a line of high-efficiency solar modules for building integrated photovoltaics (BIPV) systems. Featuring a range of solar tiles, shingles and wall panels that integrate seamlessly with any building.

Why should you choose DuPont photovoltaic solutions?

That all changed when DuPont Photovoltaic Solutions stepped in. We provided a solar solution that not only brought the people of Ladakh reliable, cost-effective, and safe energy, but it will also stand up to the area's harsh climate all year round for many years to come. China is facing a critical moment in its energy future.

The Targray Solar Division commercializes a range of silicon materials for PV manufacturers and distributors. Since 2005, our PV product portfolio has been a trusted source for high-purity polysilicon, solar silicon wafers, cells and ingots, ...

By contrast, production of polysilicon, the key material for solar PV, is currently a bottleneck in an otherwise oversupplied supply chain. This has led to tight global supplies and a quadrupling of polysilicon prices over the last year. Solar PV ...
