

Lego builds a solar power station

Does Lego have a solar power plant?

The Lego Group already makes solar-themed kits with its iconic bricks, but this time it's for real: the new factory will sport an on-site solar power plant big enough to match its entire electricity demand. Solar Power Vs. Wind Power On The Atlantic Coast

Is Lego doing its solar energy homework?

Evidently Lego has been doing its solar energy homework. Last year the company's fan-friendly new product incubator featured an expandable solar energy array complete with beehives, pollinator habitat, and grazing sheep, all of which are elements in the overlapping fields of regenerative agriculture with agrivoltaics.

Are Lego building kits powered up with LEGO Power Functions?

All Lego building kits mentioned in this list are powered up with Lego Power Functions (or its new alternative called Lego Technic Control+). They all include Lego Power Functions motor (s) for various functions. For example, the first crane set in my list uses a large motor that controls the crane's upper and lower functions.

Will Lego make a solar farm a real-world kit?

If 10,000 people with a free LEGO Ideas account vote for this idea, LEGO will consider making it a real-world kit! Solar farms, also called solar parks, are increasingly common worldwide and a lot more will be built over the next several years.

What is a DIY Lego station?

This DIY project is designed to maximize productivity during playtime by providing ample storage and a fold-away setup that grows with your child. With step-by-step instructions, you can build a station that houses all your LEGO parts neatly, features a workspace, and even includes wheels for easy transport.

Why is Lego launching a solar park in Virginia?

The new Lego announcement provides the PV industry in Virginia with a high profile example of the power of renewables to attract new business. "The location in Virginia allows us to build a solar park which supports our sustainability ambitions and provides easy links to country-wide transportation networks.

Build and display this spectacular LEGO® Ideas 21321 ISS (International Space Station). Packed with authentic ISS details, including a posable Canadarm2 and 2 rotating joints that coincide with 8 adjustable "solar panels", this 864-piece set ...
