

Monitoring bracket outdoor extended solar energy

What is a solar monitoring system?

Solar monitoring systems provide a real-time snapshot of solar energy production data from your home solar system. A good monitoring system can tell you when one or more panels (aka "modules") isn't producing as much energy as others, or whether there's some sort of electrical fault causing you to miss out on precious kilowatt-hours (kWh).

What is an aftermarket home energy monitor?

Aftermarket home energy monitors are third-party solutions that offer a broader view of your home's energy usage. These systems don't come from solar panel manufacturers or installers. Instead, they're designed to work with various energy systems in your home, including your solar setup.

How do I choose a solar monitoring system?

Here are a few terms to know. You need a monitoring system that works with your solar panels and inverter. Some systems are brand-specific, while others work with a wide range of equipment. Look for systems that show comprehensive trends and metrics. The best monitors show real-time power production, energy consumption and historical data.

Should you use a third-party Solar Monitoring System?

This wider scope lets you see how your solar production fits into your home's total energy picture. While third-party monitoring systems are most commonly used in commercial and utility-scale PV applications, Muckles noted, they're gaining popularity among DIY enthusiasts who want detailed data about their energy use.

How do I choose a home energy monitor?

When choosing an installer, ask about their monitoring options and how they compare to other systems. Aftermarket home energy monitors are third-party solutions that offer a broader view of your home's energy usage. These systems don't come from solar panel manufacturers or installers.

What is the best solar energy monitor?

1. Sense Energy Monitor The Sense Energy Monitor is a great choice for anyone who wants to get insight into their energy use. With this solar monitor, you can easily measure your solar production and power consumption in dollars.
