

# National Solar Power Plan

What is the national community solar partnership?

The National Community Solar Partnership goal is to enable community solar systems to power the equivalent of five million households by 2025 and create \$1 billion in energy savings for subscribers. This target represents a 700% increase in community solar deployment, growing from 3 GW of community solar in 2020 to 20 GW in 2025.

What is the \$7 billion solar for all program?

Highlights from the \$7 billion Solar for All selected applicants Background: The Solar for All program is a monumental \$7 billion investment to enable low-income and disadvantaged communities to deploy and benefit from solar energy.

How many acres of public lands are needed for Western Solar Plan?

In considering updates to the Western Solar Plan, the BLM worked closely with the Department of Energy's National Renewable Energy Laboratory to examine forecasts for national clean energy needs and determined that approximately 700,000 acres of public lands would be needed to meet those goals.

Should the US switch to solar power?

Solar energy's potential is off the chart, with the energy in sunlight striking the earth for 40 minutes being equivalent to global energy consumption for a year. Our analysis convinces us that a massive switch to solar power is the logical answer for the US to free itself from fossil fuels.

What is the 60 solar for all program?

This is a win for the environment, a win for consumers, and a win for the economy." EPA estimates that the 60 Solar for All recipients will enable over 900,000 households in low-income and disadvantaged communities to deploy and benefit from distributed solar energy.

What is a solar price support program?

A solar price support program is a plan to secure the nation's energy future by providing subsidies for solar energy. The subsidies would be gradually deployed from 2011 to 2020. With a standard 30-year payoff interval, the subsidies would end from 2041 to 2050.
