

# New Energy Lithium Energy Storage Project Bidding

What are the implications of a combined renewables-plus-storage project?

There will be important implications for a combined renewables-plus-storage project depending upon whether the project is DC coupled or AC coupled. For example, AC coupled systems are generally viewed as being simpler since the renewable energy storage can be connected separately with AC power.

What is augmentation in energy storage?

Augmentation: In the context of energy storage, "augmentation" refers to the process of adding storage capacity to a project over time and is typically seen in the context of battery energy storage projects.

How can energy storage technology improve resiliency?

This FOA supports large-scale demonstration and deployment of storage technologies that will provide resiliency to critical facilities and infrastructure. Projects will show the ability of energy storage technologies to provide dependable supply of energy as back up generation during a grid outage or other emergency event.

What are the operational limitations of energy storage?

Operating Limitations: Energy storage resources may be subject to operational constraints that do not affect traditional generation projects. For example, certain battery technologies will degrade more quickly if the state of charge is not actively managed within a certain range.

Will energy storage save the energy industry?

It's generation . . . it's transmission . . . it's energy storage! The renewable energy industry continues to view energy storage as the superhero that will save it from its greatest problem--intermittent energy production and the resulting grid reliability issues that such intermittent generation engenders.

How do energy storage contracts work?

For standalone energy storage contracts, these are typically structured with a fixed monthly capacity payment plus some variable cost per megawatt hour (MWh) of throughput. For a combined renewables-plus-storage project, it may be structured with an energy-only price in lieu of a fixed monthly capacity payment.
