

New Energy Photovoltaic Panel Consultation

What happens after a solar consultation?

Following the consultation, we'll conduct a site assessment to evaluate your property's solar potential. This involves taking measurements and analyzing factors such as shading, roof pitch, and orientation to determine the best placement and size for the solar panels.

Who is solar engineering & photovoltaic design?

As a full-service engineering firm, our in-depth knowledge of solar engineering and photovoltaic design enables us to provide the most comprehensive services to our clients ranging from conceptual design and feasibility studies through full engineering and construction.

How do I get a energy consultation?

With national companies, a consultation might begin as a virtual meeting with a company representative. If the company works with a certified dealer in your area, that visit might be in person. The consultation should involve a discussion of your annual energy needs and the type of system you are interested in.

How do I find a solar installer in Los Angeles?

If you are looking for a solar installer in Los Angeles, take your time to thoroughly research your options. Ask for quotes from multiple companies and read customer reviews and testimonials before signing a contract. You can review CNET's picks for top solar companies if you need a place to begin your research.

What services do you offer after a solar system is installed?

After the installation is complete, we offer ongoing monitoring and maintenance services to ensure that the solar system is functioning optimally and providing the maximum possible energy savings. This includes regular inspections, cleaning, and any necessary repairs or upgrades to the system.

Does momentum solar install Enphase batteries?

Momentum Solar puts Qcells solar panels on roofs in 11 states, and installs Enphase batteries alongside them in five of those. Momentum is one of a few companies that will price match quotes from other companies. It also receives an A-plus from the Better Business Bureau.

Your solar energy installer and local utility company can provide more information on the exact steps you will need to take to power your home with solar energy. Investigate your home's energy efficiency. Assess your solar potential and any ...
