

Outdoor Energy Storage Liquid Cooling Battery Cabinet

What is included in a battery cabinet?

Each battery cabinet includes an IP56 battery rack system, battery management system (BMS), fire suppression system (FSS), HVAC thermal management system and auxiliary distribution system. Outdoor liquid cooled and air cooled cabinets can be paired together utilizing a high voltage/current battery combiner box.

Can a liquid cooled and air cooled cabinet be paired together?

Outdoor liquid cooled and air cooled cabinets can be paired together utilizing a high voltage/current battery combiner box. Outdoor cabinets are manufactured to be a install ready and cost effective part of the total on-grid, hybrid, off-grid commercial/industrial or utility scale battery energy storage system. BESS string setup examples are:

What are the different types of energy storage systems?

Outdoor All-in-One Energy Storage System Fully integrated battery, PCS, BMS, fire extinguish system and liquid-cooling system. Modular and Scalability. Residential Energy Storage System Integrated liquid-cooling system and fire protection system. Modular and Scalability. Utility Energy Storage System Integrated high-efficiency liquid-cooling system.

What is a 373kwh outdoor cabinet?

Each outdoor cabinet is IP56 constructed in a environmentally controlled liquid cooled cabinet including fire suppression. Multiple 373kWh cabinets can be installed together creating up to 4472kWh energy storage blocks. Designed for 373kWh's to 100MWh+ systems.

What are outdoor cabinets?

Outdoor cabinets are manufactured to be a install ready and cost effective part of the total on-grid, hybrid, off-grid commercial/industrial or utility scale battery energy storage system. BESS string setup examples are: Battery Packs utilize 280Ah Lithium Iron Phosphate (LiFePO₄) battery cells connected in series/parallel.

What is a liquid cooling system?

The integrated frequency conversion liquid cooling system helps limit the temperature difference among cells within 3 °C, which also contributes to its long service life. It has a nominal capacity of 372.7 kWh with a floor space of just 1.69 square meters. The system is suitable for inverters with operating voltages ranging from 600 to 1500 volts.

Absen's Cube air/liquid cooling battery cabinet is an innovative distributed energy storage system for commercial and industrial applications. It comes with advanced air cooling technology to quickly convert
