

Does China Development Bank offer credit support for PV projects?

To effectively boost the investment on PV projects and bring financial leverage into full play, China Development Bank (CDB) decided to offer credit support with a period of up to 15 years to PV projects in 2013. Meanwhile, CDB also supports local governments to build special funds by offering them credits.

Why are PV installations growing so fast in China?

(3) The rapid growth of PV installations in China, from 1 Gigawatts (GW) in 2010 to 306 GW in 2021, is attributed to significant policy and financial support (e.g., direct fiscal subsidies, preferential loan interest rates, and tax incentives (4-6)) from the central government.

How can Chinese electricity system optimization be used for solar PV deployment?

Therefore, we employ the widely used Chinese electricity system optimization model based on the one-node-per-province network of Liu et al. (2019) (46) to project the differentiated power mixes, energy storage demands and interprovincial electricity transmission capacity under different solar PV deployment scenarios.

Do solar photovoltaic interventions reduce rural poverty in China?

Zhang, H.; Wu, K.; Qiu, Y.; Chan, G.; Wang, S.; Zhou, D.; Ren, X. Solar photovoltaic interventions have reduced rural poverty in China. *Nat. Commun.* 2020, 11 (1), 1969 DOI: 10.1038/s41467-020-15826-4 McPherson, M.; Johnson, N.; Strubegger, M.

Is PVPA a new concept in China?

Starting in 2014, PVPA is a relatively new concept in China. However, some scholars have already started studying on the combination of renewable energy promotion and poverty alleviation from different perspectives, both in China and abroad, ..

Which level of PV power generation will be involved in PVPA projects?

Therefore, only the first level and the second level of PV power generation will be involved in PVPA projects. Accordingly, the FiT is set according to the different levels of solar resource, at 0.80 RMB/kWh and 0.88 RMB/kWh in level 1 and level 2 areas respectively.
