

# Photovoltaic 540 panels

How many cells are in a 540 watt solar panel?

To give you an idea, a standard 540 watt solar panel is approximately 88 x 46 inches and tips the scales at around 72 pounds. Most modules with this output rating are monocrystalline and typically have at least 72 cells (144 half-cut cells). Efficiencies vary widely from brand to brand, but most monocrystalline options fall into 18-22% range.

What is the warranty on 540 W solar panels?

Installing 540 W solar panels is simple enough, despite their larger size compared to standard panels. They typically come with a 25-year warranty, though some higher-end brands offer 30-year protection. Use our solar calculator to determine the optimal size for your installation.

What is the warranty on a 540 W ZnShine solar panel?

A substantial 12-year product warranty is also included with this 540 W ZnShine Solar solar panel. This model's construction makes it perfect for both residential and business rooftops. Durability and strength are increased by using a strong, robust frame built from anodized aluminum.
