How do I connect my inverter to a photovoltaic panel?

The electrical power and signals wiring from the inverter to the AC Grid and to the photovoltaic panel are connected through the Switch Boxes described in Fig.11 SB-01 - "DC Switch Box Layout" -using the access windows in pos "A" for the power cables and the windows in pos "D" for the signal cables.

How does a PV inverter work?

The inverter converts the DC from PV modules to AC with the same frequency and phase as the AC grid. All or part of the AC power is supplied to local loads, and the surplus supplied to the electricity grid.

How to turn on a PV inverter?

Make sure the DC open circuit voltage of input strings is less than 1500V. ) Turn on the AC circuit breaker. ) Turn on the DC circuit breaker. (Skip these two steps if there are no circuit breakers.) ) Switch the DC Switch to the "ON" position. When the energy supplied by the PV array is sufficient, the LED of inverter will light up.

What if a photovoltaic inverter is not connected to Earth?

Any failure of an inverter which is not connected to earth by the appropriate terminal block or fastening screws is to be considered outside the warranty. photovoltaic inverters 8.2 mechanical checks Make sure the cable glands are mounted properly. The cable glands must be adequately locked and prevent any movement of the cable.

How many inverters can a photovoltaic system handle?

The AURORA is capable of handling 2 separate arrays. If the output of photovoltaic system exceeds the capacity of a single inverter, additional Aurora inverters can be added to the system; each inverter will be connected to an adequate section of the photovoltaic field on the DC side and to the grid on the AC side.

How do I connect a PC-inverter?

The PC-inverter connection cable is a standard USB 2.0 cable, 5 meters long, with terminals of the A and B type. Just remove the waterproof plug located on Aurora's side to make the connection (see Fig. 26). Three connections are provided to drive an external alarm: a common contact, a normally open contact and a normally closed contact.
