Can a waterless cleaning method remove dust from solar panels?

Dust that accumulates on solar panels is a major problem, but washing the panels uses huge amounts of water. MIT engineers have now developed a waterless cleaning method to remove dust on solar installations in water-limited regions, improving overall efficiency. Image courtesy of the researchers.

How do you clean dust off solar panels?

One of the most common ways to clean dust off solar panels is to spray them with water. But that's a huge waste of water, especially in desert settings, where there are a lot of solar farms. The MIT scientists note in their new study, which is published in Science Advances:

How do you clean solar panels?

The best way to clean solar panels is to use a soft-bristled brush or squeegee specifically designed for solar panels, along with a mild soap or specialized cleaning solution. Avoid abrasive materials, excessive pressure, and cleaning during the hottest part of the day. Rinse thoroughly and dry the panels to prevent water spots.

Can you use deionized water to clean solar panels?

Solar maintenance companies like US-based Bland Company and Premier Solar Cleaning have found that using deionized water with a rolling or vehicle-mounted brush allows them to clean panels without using soap, which leaves a residue that not only shades panels but attracts dirt.

How do you clean solar panels on a roof?

Cleaning solar panels on a roof requires extra precautions for safety. Use a sturdy ladder or roof anchor system, and wear non-slip shoes. Start by rinsing the panels with a garden hose, then gently scrub with a soft brush and mild soap solution. Rinse thoroughly and dry with a squeegee or cloth. 3. What is the best way to clean solar panels?

How does Ecoppia clean solar panels?

In the Middle East, Ecoppia deploys solar-powered autonomous robots to clean PV panels nightly using soft microfiber and airflow rather than water, as high-pressure washing can damage the panels. The robots also clean their own on-board solar panels and recharge their batteries quickly between operations.
