

How to dismantle solar panels?

Method of dismantling solar panels and component separation based on physical and chemical properties, structure, and materials. By analysing pros and cons of three methods for solar-panel disposal (artificial disassembly, use of an organic solvent, and heat treatment), it was found that heat treatment process as the prime solution.

Should we reclaim solar panels through the decommissioning phase?

The fact remains the solar industry is skyrocketing in growth, despite any short-term logistical or policy setbacks. As such, the need to process and reclaim solar panels through the decommissioning phase is a high priority for getting ahead of a huge waste wave.

Which companies recycle solar photovoltaics?

First Solar, a U.S.-based manufacturer, has established recycling facilities globally (Kant and Singh, 2022; Cui et al., 2022; Nain and Kumar, 2022). China recycling regulation: China, a major player in the solar photovoltaic market, has witnessed substantial growth in manufacturing and deployment.

How is photovoltaic waste treated in India?

India recycling regulations: As of now, India lacks specific rules and regulations dedicated to the management of photovoltaic (PV) panel waste, and it is currently treated under general waste regulations (Preet et al., 2023).

Who is responsible for developing policies relating to PV panel waste?

The responsibility for developing policies related to waste, including PV panel waste, falls under the purview of the Ministry of Environment, Forest and Climate Change by the Solid Waste Management Rules and the Hazardous and Other Wastes (Management and Transboundary Movement) Rules (2016a and 2016b) (Rathore and Panwar, 2022).

Should PV panels be recycled?

As current PV installations reach the final decommissioning stage, recycling and material recovery will be preferable to panel disposal. The developing PV recycling industry typically treats EOL PV panels through separate batch runs within existing general recycling plants. This allows for material recovery of considerable components.
