

# Photovoltaic panel installation information form

How do I install a solar PV system?

Careful planning is crucial when installing a solar PV system. Follow these guidelines: Research local building codes and permit requirements. Most solar installations require an electrical and/or building permit. Determine if your utility requires an interconnection agreement to connect your solar system to their grid.

Do I need a building permit to install a PV system?

ordinances requiring certain new buildings to install PV systems.<sup>13</sup> Permitting and inspection Most local governments require a building permit prior to the installation of a PV system to ensure the system meets engineering and safety standards. After installation of a PV system is completed and

Do you need a permit to install solar panels?

Generally, local governments require a homeowner's solar installer/contractor to obtain a permit for rooftop panels before they can be installed. After the PV system is installed, a professional from the local government will inspect the new array to ensure all building, electrical, and safety codes have been followed.

How to install solar panels?

Once racks are in place, installers have to carefully place solar panels on them while utilizing suitable clamps or mountings. The solar system needs to be wired after mounting equipment's. Electrical conduit should run from various parts like inverters, disconnects, electrical panels to the solar panels among others.

Do I need to meter a photovoltaic system?

It is assumed that aluminum framed photovoltaic (PV) panels mounted on a "post" and rail mounting system, the most common in the industry today, will be installed by the homeowner. While metering the system is encouraged, the specification does not address system wiring elements for associated system sensors or monitoring equipment.

What happens after a PV system is installed?

After the PV system is installed, a professional from the local government will inspect the new array to ensure all building, electrical, and safety codes have been followed. The utility will then approve the interconnection of the system to the grid and it can begin generating power.
