Photovoltaic panel price trend over the past decade

Solar panels in 2010 cost about $8.70 per watt and were about 15% efficient. Today, solar panels cost about $3.00 per watt on average and are between 19% and 22% efficient. The price of solar panels could continue to drop, but it can ...

The decreasing cost of solar panel modules has been the primary driver of this trend. solar panel module prices have decreased by 92% since 1998. According to Berkeley Lab"s 2022 edition of the Tracking the Sun report, the installed ...
