

Photovoltaic panel product quality insurance

Are solar panel insurance policies standardized?

Despite many years of commercial solar applications and an increasingly larger and international solar market, solar panel insurance products are not yet standardized or normalized in the insurance industry. A number of insurers offer solar panel insurance policies, however the premium can be still prohibitively high.

What types of warranties cover solar panels?

There are two basic types of warranties that cover solar panels. A product warranty protects you from defects in a solar panel stemming from material quality or manufacturing errors. This is also referred to as an equipment or materials warranty.

Does home insurance cover solar panels?

Basic home warranties do not cover solar panel systems because they are considered permanent attachments to the home and are part of the structure. However, PV installers and solar panel manufacturers typically offer warranties, and most homeowners insurance covers solar energy systems from the unexpected, like fire, hail, or storm damage.

Do solar PV projects need insurance?

Insurance is based on statistics, which are not there yet. The only way for insurance companies to respond is to assign the highest possible risks to solar PV projects and charge for that accordingly. Solar panel project developers are already able to purchase PV insurance from several insurance companies.

What is the difference between value and premium solar panels?

The biggest difference between value and premium panels is usually the solar panel efficiency and the warranties. In general, there are three different types of warranties that cover solar panels. Also, homeowners insurance is an option to cover damage from weather, fires, or vandalism. PV modules are exposed to the elements every day.

What is PV warranty insurance?

The video is not available. Check out in 140 seconds how you will benefit from our PV Warranty Insurance for up to 30 years. Our PV Warranty Insurance is straightforward and effective: manufacturers protect their ability to pay excessive warranty claims on modules for a period of 25 years (up to 30 years for glass-glass modules).

Optimizes your liquidity and financial stability, even in case of underperformance or high warranty claims. Creates confidence in the performance of your products: insurance covers warranties for all modules for up to 30 years. Positions you ...
