

Are photovoltaic power installations in Yunnan and Guangdong competitive?

For Yunnan, Guangdong, and Hubei, the photovoltaic power installations are at low levels with neighboring provinces, showing a relatively weak regional competition pattern. In addition, the photovoltaic power installation in different stages varied at the provincial level.

Where is photovoltaic power installed in China?

In addition, the total installed photovoltaic capacities in Southwest and South China are relatively low, while the competitive patterns of photovoltaic power installation in Northeast China, including Heilongjiang and Liaoning provinces are becoming increasingly obvious.

What is the regional distribution of photovoltaic power stations in China?

In general, the regional distribution of photovoltaic power stations in China is quite different, and the regional competition patterns are variable. Provinces with high installed photovoltaic power stations and high regional competition are mainly located in Northwest and North China.

What are the spatial-temporal characteristics of photovoltaic power installation in China?

According to the photovoltaic power installation distribution, the spatial-temporal characteristics of the photovoltaic power installation in China can be depicted. The photovoltaic power development stages could be classified into Full operation, Partial operation, Announced construction, Permitted construction, and Under construction.

Can photovoltaic power stations promote China's low-carbon transition?

To promote China's low-carbon transition, the construction of photovoltaic power stations is practical in various provinces of China. Since the photovoltaic power stations can maintain 25 years, the cumulative emission reduction potentials can be quantified to measure the contribution to low-carbon transition.

Where are the cold spots of photovoltaic installation in China?

South China and Southwest China, including Guangxi, Guangdong, Fujian and Chongqing are generally the cold spots of photovoltaic installation, with relatively small installed capacities at each stage. Fig. 3. Moran scatter of China's provincial photovoltaic installation.

Photovoltaic panel production of Guangdong Power Group
