

What color solar panels are available?

From full black to snow white - variety of solar panel color options is where Metsolar stands out. We are an EU manufacturer of Building Integrated Photovoltaic (BIPV) solar panels for commercial and residential buildings.

What type of solar panels does metsolar manufacture?

Metsolar manufactures semi transparent glass/glass,glass/backsheet BIPVsolar panel options with possibility for variations in size,shape,transparency,JB,etc. For seamless solar glass integration and blending design. Full black modules are used when complete fusion with an object and invisibility is required.

How does elemex deliver solstex solar panels to building sites?

Elemex delivers Solstex solar panels to building sites through our network of agents and installers. The solar panels arrive as a pre-fabricated facade system on our Unity platform,enabling the installer to quickly and accurately add a beautiful solar facade to any structure. Installation guide and specifications are available.

Why should you choose colored solar modules for energy-active buildings?

The advantages of choosing colored solar modules for energy-active buildings and building elements empower future cities not only with exceptional design but to move towards energy consumption efficiency. Wast integration of green energy greatly reduces the carbon footprint and greenhouse emissions of buildings.

Which solar companies are using colorisation techniques?

They are using colorisation techniques provided for by the likes of Solaxess,Kromatix,and Glas Trösch. Others mentioned,include U.S.-based Sistine Solar and China-based Advanced Solar Power.

Are 108 cells suitable for building integrated photovoltaics?

The 108 cells modules are now also available with coloured glass and coloured frame which transform the module into a pleasant architectural element for Building Integrated Photovoltaics. They are also suitable for particular requirements for historic city centers or for special architectural needs of modern constructions.

Solar panel lamination is crucial to ensure the longevity of the solar cells of a module. As solar panels are exposed and subject to various climatic impact factors, the encapsulation of the solar cells through lamination is a crucial step ...
