

Photovoltaic panel transport back rack tool

What is a tamarack solar module racking structure?

Our innovative solar module racking structures are designed to install quickly and provide secure mounting for modules from nearly all manufacturers. With pole, roof, and ground mounts for solar panels, the Tamarack line of products has a solution for your grid-tied or off-grid application.

Can a powerrack be used in a ground-mounted solar panel kit?

Compatible With All Ground-Mount Kits The PowerRack can be substituted for rail-based racking in any of our ground-mounted solar panel kits. Fixed 25-degree pitch is optimal for the majority of locations in the USA. Ground can be leveled to change the mounting angle if necessary. 2 PowerRacks are required to mount each solar panel.

What is powerrack?

Meet PowerRack, the world's simplest ground-mount solar installation system, designed to mount solar panels without digging holes and pouring concrete footings.

How does a PV module work?

The device uses your existing fiberglass Werner or Louisville extension ladder. A pulley system is attached to the top of the ladder. A patented module "hook" attaches to the edge of a PV module frame and prevents lateral sliding of the module in the hook. An operator pulls the rope to raise the module.

Why should you choose a powerrack ballasted mounting system?

The virtue of the PowerRack system is its simplicity. You won't have to dig holes, pour concrete footings, or set steel pipes to provide a support structure for your array. As a result, PowerRack systems are more affordable and easier to install than a fixed ground mount. Why Choose the PowerRack Ballasted Mounting System? Reduce Project Costs

What is a ballasted powerrack system?

The ballasted PowerRack system is designed to skip the costly and time-consuming step of pouring concrete during your installation. When filled, the PowerRack provides a sturdy racking foundation that stands up to the test of time. But what if you move homes and need to relocate your array?

The Solmetric Module Lift is designed to safely and quickly transport a PV module to a roof. The device uses your existing fiberglass Werner or Louisville extension ladder. A pulley system is attached to the top of the ladder. A patented module ...

One thing many solar investors don't always consider is transporting...whether from a store to your home or from one home to another. Granted, when you have a solar array installed the installation company will do the
