

Photovoltaic solar panel replacement

Should you replace old solar panels?

Replacing your old solar panels with new solar panels. Today's solar panels generate about 25% more electricity from the same roof space as equipment from just 5 years ago, and even more compared to decade-old panels. Sometimes, replacing your old equipment can yield the biggest payoffs. How can replacing old solar make any sense?

Should you upgrade or replace your solar panels?

Old solar panels, while still functional, might not be harnessing solar energy as effectively as the newer models. Replacing or upgrading to a more advanced model can thus translate to more electricity generation from the same square footage. Economic logic often drives homeowners and businesses to consider upgrades.

Should you replace a roof and install solar panels simultaneously?

Cost efficiency: Replacing a roof and installing solar panels simultaneously can be more cost-effective in the long run. This approach eliminates the need for future expenses and inconveniences associated with removing and reinstalling solar panels for roof work.

Should I remove or reinstall my solar panels?

Solar removal and reinstallation may also be necessary when you're moving to a new home, and you wish to relocate your system. If that is the case, make sure you have a trained installer handle the entire job so it's done safely and securely to protect your investment. [Can I Remove and Reinstall My Solar Panels Myself?](#)

Can solar panels be repaired on a roof?

While repairing many parts of your solar power system can be done on the roof, it is often much safer to do this work after the panels are removed. Regardless of the type of solar panels, taking this additional step creates important space for analyzing the entire system thoroughly.

How to choose a solar roof replacement company?

This protects you from liability in case of accidents or damage during the roof replacement. Seek coordination capabilities: Choose a company that is willing and capable of coordinating with your solar panel provider. Seamless communication between these two parties is crucial for a hassle-free roof replacement.

If you have a broken solar panel, call our Service Department first. You should never attempt to remove a solar panel on your own. Our service team will either repair it off-site, or recycle the panel at a glass recycling facility. Alternatively, ...
