

# Photovoltaic support construction acceptance regulations

What conditions should a roof support a photovoltaic panel system?

Roof structures that support photovoltaic panel systems shall be designed to resist each of the following conditions: 1. Applicable uniform and concentrated roof loads with the photovoltaic panel system dead loads.

What are the standards for photovoltaics?

There are numerous national and international bodies that set standards for photovoltaics. There are standards for nearly every stage of the PV life cycle, including materials and processes used in the production of PV panels, testing methodologies, performance standards, and design and installation guidelines.

What is a photovoltaic solar system code section?

This collection of provisions imports code sections which address Photovoltaic Solar Systems, and the structural, fire safety and energy conservation measures for them. These are specific to Solar Systems.

Are photovoltaic solar energy systems safe?

The safe and reliable installation of photovoltaic (PV) solar energy systems and their integration with the nation's electric grid requires timely development of the foundational codes and standards governing solar deployment.

Can a roof deck support a photovoltaic panel system?

Structures with open grid framing and without a roof deck or sheathing supporting photovoltaic panel systems shall be designed to support the uniform and concentrated roof live loads specified in Section CS507.1.1.1 (IBC 1607.13.5.1), except that the uniform roof live load shall be permitted to be reduced to 12 psf (0.57 kN/m<sup>2</sup>).

What are the NFPA requirements for solar PV systems?

The electrical portion of solar PV systems shall be installed in accordance with NFPA 70. CS512.2 (IFC 1204.2) Access and pathways. Roof access, pathways, and spacing requirements shall be provided in accordance with Sections CS512.2.1 (IFC 1204.2.1) through CS512.3.3 (IFC 1204.3.3).

Many organizations have established standards that address photovoltaic (PV) system component safety, design, installation, and monitoring. Standards are norms or requirements that establish a basis for the common understanding ...
