

Photovoltaic support equipment auction information

Should you sell your solar equipment at a solar auction?

The flexibility to sell single parts comes in handy for legacy models or project leftovers that attract buyers who are looking for replacement parts. While on auction sites, solar equipment lot sizes are large (usually starting at 500 kilowatts and spanning into megawatt levels).

How can auction design support system integration?

A fifth potential strategy for supporting system integration through auction design involves fundamentally changing the way renewable energy is procured, by focusing on products rather than on the technologies used to produce them.

Are energybin auction sites reputable?

EnergyBin has many reputable resellers that work with buyers on inspection terms. They recognize the importance of preserving their business reputations. Whereas, auction sites promote AS IS, WHERE IS and usually don't allow buyers to inspect lots in advance to purchase.
